

Julanda Ndoj

SOFTWARE DEVELOPER

Como, Italy • +39 389 065 8328 • bacajulanda@gmail.com • linkedin.com/in/julanda-ndoj

PROFESSIONAL SUMMARY

I'm a Software Developer with over 6 years of experience building web applications, backend APIs, and microservices that run reliably at scale. My core stack centers on PHP (Laravel, Symfony) and Vue.js, supported by event-driven systems like Kafka and AWS cloud deployment. I prioritize code quality through test-driven development (TDD) and clean architecture, backed by a practical problem-solving mindset built across software engineering, business management, and tech education.

CORE COMPETENCIES

Languages & Frameworks
PHP, Laravel, Symfony, JavaScript (Vue.js), HTML5, CSS3
Architecture & Design
Microservices, Event-Driven, DDD, CQRS, TDD, REST APIs
Databases & Messaging
MySQL, Apache Kafka
Testing & Code Quality
Pest, Cypress (E2E), PHPStan (Static Analysis)
Cloud, Security & Gateways
Amazon Web Services (AWS), Keycloak (IAM), Kong API Gateway
Other Skills
operations

PROFESSIONAL EXPERIENCE

Software Developer • Bene Assicurazioni	Milan, Italy 09/2024 – Present
- Develop and maintain core web applications and REST APIs utilizing the Laravel framework and MySQL. - Enforce strict code quality and reliability through static analysis validation via PHPStan and comprehensive test automation using Pest (unit/feature) and Cypress (E2E). - Build interactive, reactive front-end user interface components using Vue.js. - Administer and deploy application services directly on AWS cloud infrastructure.	
Software Developer (Backend) • Wefox	Milan, Italy 09/2023 – 09/2024
- Engineered backend microservices within a distributed architecture using Symfony. - Implemented real-time asynchronous event streaming pipelines with Apache Kafka. - Managed identity access management and API traffic routing using Keycloak and Kong API Gateway. - Applied Domain-Driven Design (DDD), CQRS, and Test-Driven Development (TDD) principles to maintain domain isolation and system reliability.	

Web Developer • [PressToday](#)

Milan, Italy | 06/2020 – 09/2023

- Architected and maintained robust Laravel backend systems supporting core media tools.
- Developed web scraping and data aggregation pipelines to automate content processing.
- Collaborated in cross-functional teams to continuously refactor legacy code, optimize query execution, and implement new features.

Completed Web Developer Internship • [PressToday](#)

Milan, Italy | 12/2019 – 06/2020

Retail Operations & Finance Lead • [Independent Family Market](#)

Shkoder, Albania | 01/2014 – 11/2019

- Managed end-to-end daily business operations, point-of-sale (POS) systems, and inventory databases for a fast-moving consumer goods store tracking thousands of SKUs.
- Executed daily financial reconciliations, revenue tracking, expense logging, and supplier accounts payable with 100% accuracy.
- Controlled inventory stock intake, supplier purchase schedules, price tagging, and loss prevention strategy.
- Built loyal customer relationships through consistent, dependable service in a fast-paced retail environment.

Informatics / IT Educator • [Shkolla Dituria](#)

Shkoder, Albania | 09/2013 – 01/2014

- Taught core computer science and information technology modules to high school students, covering computer fundamentals, software applications, and basic logic.
- Developed structured lesson plans, practical computer lab exercises, and coursework designed to build digital literacy and technical problem-solving skills.

EDUCATION

Master of Science in Business Informatics

2014 – 2016

European University of Tirana, Tirane, Albania

Bachelor of Science in Information Technology

2010 – 2014

Universiteti i Shkodrës "Luigj Gurakuqi", Shkoder, Albania
